

Jet Diffusers
BM-DRM-01

Jet Diffusers

BM-DRM-01

BM-DRM-01 diffusers are designed to meet the needs of architectural applications demand and maintaining optimal air distribution performance over long distances. These jet diffusers boast fully adjustable, aerodynamic pattern controllers made from extruded aluminum.

BM-DRM-01 offers the perfect blend of engineering prowess and architectural allure.

Typical Applications

They can be mounted on the wall to diffuse the air horizontally in large spaces, or the ceiling to diffuse the air downward, for instance to cover high windowed walls.

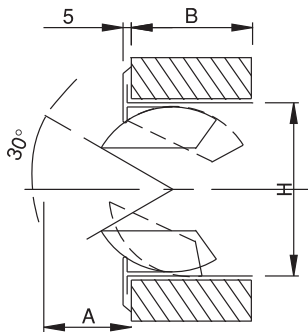

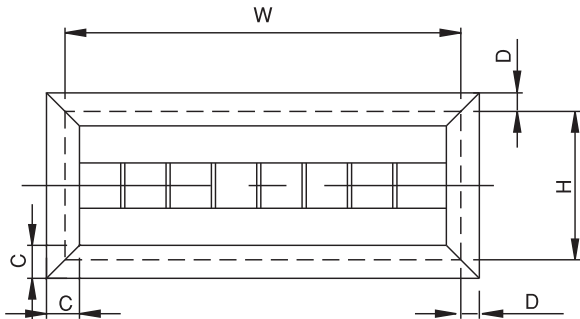

Ideal for

- Shopping centers
- Airports
- Stations
- Sport halls
- Large spaces

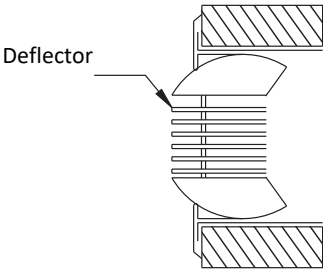

Design

- Supply angle of $\pm 30^\circ$ the airflow can be adjusted both downwards and upwards
- Installation on wall to diffuse the air horizontally
- Installation on ceiling to diffuse the air downward
- For supply air to room air temperature differences from -12 to $+15$ K
